

2-DRUM NESTABLE SPILL PALLET

Nestable, Compliant, Drum Storage & Spill Containment

Designed for durability, safety, and convenience, the pallet combines two-drum storage and effective spill containment in a compact, nestable format. Easy stacking and versatile forklift pockets allow cost-effective export and transportation, whatever your liquid storage requirements.

Robust polyethylene (LLDPE) construction, integrated platform, chemical compatibility and high-capacity spill containment makes this pallet a smart addition to your liquid storage projects.

Key Features

- » **Safe Storage:** store 2 x 205 L drums and contain spills up to 250 L
- » **Nestable:** space-saving design lowers shipping and storage costs
- » **Removeable Platform:** easy cleaning, maintenance and inspection
- » **Polyethylene Construction:** impact resistant, UV protection and durable
- » **Chemical Compatibility:** store and dispense hazardous liquids safely
- » **Forklift Friendly:** forklift pockets for manoeuvrability
- » **Versatile:** create flexible drum storage set ups/infrastructure

Specification

Part number:	SJ-110-002
Dimensions (H x W x D):	505 x 1450 x 800 mm
Weight:	23 kg
Capacity:	250 L
Max. load:	500 kg
Material:	LLDPE
Pallet quantity:	15
